Magento 2 Essentials

The available zip file represents all the code developed to Magento 2 Essentials. To use the developed code:

1. Install Magento 2 by following the Chapter 1;
2. Unzip the file and move the directories to your respective system path;
3. Create a Twitter API token, following Chapter 6, and insert it in the file app/code/Packt/TweetsAbout/Block/Tweets.php;
4. Run the command php bin/magento setup:static-content:deploy to generate the theme's static files;

Don't forget to insert the products in Admin Area to test the navigation.

Have Fun!
